## Glo Brite® Custom Solutions

As the only vertically integrated domestic manufacturer of photoluminescent film and sheets, we encourage you to draw upon our extensive raw material expertise and casting/laminating experience to create new product solutions. Through our propriety manufacturing methodology we excel in taking photoluminescent pigments, compounding them into various polymer matrixes and producing thermoplastic and thermo set film based technology for the graphics, apparel, safety, and security market-places. Depending on your specific requirements we can build products to any luminance value while also ensuring that the technology meets your specific performance criteria. Challenge Jessup Manufacturing to be your "Total Solutions Provider" for all of your safety or promotional photoluminescent technology requirements.
