GLO BRITE® EXIT AND EGRESS

Photoluminescent signs and tapes

LIGHTING THE FUTURE

Glo Brite® exit signs, egress markings, and safety signs are consistently visible and require no energy, maintenance, or special disposal. Glo Brite® meets safety lighting requirements from a 100-foot hallway to a high rise building stairwell.

Glo Brite® exit signs do not require electricity, batteries or harmful radioactive tritium and last more than 25 years. Unlike tritium exit signs, Glo Brite® photoluminescent exit signs are intrinsically safe and are not radioactive or create a health risk.

Safety is a top concern for building owners, architects, contractors and product specifiers. Photoluminescent safety products provide lifesaving reliability while saving money on labor, maintenance and energy costs.

THE SCIENCE OF PHOTOLUMINESCENCE

Glo Brite® exit signs, egress markings, and safety signs are made with photoluminescent material. The photoluminescent pigments used in these products absorb and store energy from ambient light. In the case of sudden darkness, such as a power outage, the photoluminescent material is immediately visible. Building codes and transportation safety standards now include the use of photoluminescent products for essential life safety applications.

Jessup custom mixes strontium aluminate to manufacturer glow-in-the-dark films. Those films are converted and used by safety equipment companies, sign companies and a wide range of original equipment manufacturers (OEM) for life safety applications. Jessup can cast, laminate, and die-cut your part. Our Solve + Make™ service for your custom photoluminescent materials include supply chain services too.

GLO BRITE® PF100 EXIT SIGNS

Ideal for indoor locations and visible at 100 feet, Glo Brite® PF100 exit signs are the preferred energy-savings choice for commercial buildings, retail stores, schools and universities, healthcare facilities, and other buildings. Glo Brite® PF100 exit signs are UL 924 Listed and they charge with ambient light from LED, fluorescent, mercury vapor and metal halide light sources.

FEATURES

- Visible at 100 feet
- Zero energy consumption- zero cost, green design, sustainable
- Zero maintenance- no bulbs, no battery replacement
- Non-toxic, non-radioactive
- No disposal costs
- Designed for wall, flag, ceiling or conduit mounting
- Can be used for both high-level and low-level applications
- Easily movable if egress path changes
- Thin, low profile construction
- Consistent, uniform illumination
- Recyclable
- LEED point contributor
- Available in red, green or black frames

COMPLIANCE

 UL 924 Listed Exit Signs

Hardware included for wall, flag, ceiling or conduit mounting

GLO BRITE® PM100 EXIT SIGNS

Glo Brite® PM 100 is designed for outdoor and wet locations with visibility up to 100 feet. Whether you need safety signage in an outdoor garden center, hotel courtyard, school playground, food manufacturing plant, indoor swimming pool or an outdoor corridor, the PM100 is an excellent choice for eco-friendly safety that is cost-effective. This sign uses the latest in photoluminescent technology and charges with ambient light from LED and fluorescent light sources. When fully charged, PM100 signs are visible and readable for a minimum of 90 minutes.

FEATURES

- Visible at 100 feet
- Listed for indoor, outdoor and wet locations
- Zero energy consumption - zero cost, green design, sustainable
- Zero maintenance - no bulbs, no battery replacement
- Non-toxic, non-radioactive
- No disposal cost
- Designed for wall, flag, ceiling or conduit mounting
- Can be used for both high-level and low-level applications
- Movable if egress paths change
- Thin, low profile construction
- Consistent, uniform illumination
- Recyclable
- LEED point contributor
- LED or fluorescent light activation
- Available in red, green or black frames

UL 924 Listed Exit Signs

Hardware included for wall, flag, ceiling or conduit mounting

GLO BRITE® P50 EXIT SIGNS

Glo Brite® P50 Exit signs are available in acrylic, aluminum and plastic frames, and provide a contemporary appearance to complement the interior design of front offices, hotels, motels, and shopping malls. Glo Brite® P50 exit signs charge with LED, fluorescent, metal halide or mercury vapor light sources. The sign is suitable for both high and low-level locations and provides consistent, uniform illuminated visibility at 50 feet. Also available from the P50 series is a wall mounted exit sign suitable for less formal interiors and movable construction areas.

FEATURES

- Visible at 50 feet
- Zero energy consumption - zero cost, green design, sustainable
- Zero maintenance - no bulbs, no battery replacement
- Non-toxic, non-radioactive
- No disposal cost
- Designed for wall, flag and ceiling mount
- Plastic frame for wall mount only
- Can be used for both high-level and low-level applications
- Movable if egress paths change
- Thin, low profile construction
- Consistent, uniform illumination
- Recyclable
- LEED points contributor
- Available in red or green lettering

GLO BRITE® PF50 EXIT SIGNS

The PF50 exit sign is versatile enough to be used in commercial buildings, stores, schools, and offices. This sign is UL 924 listed for up to 50 feet viewing distance and charges with LED, fluorescent, mercury vapor or metal halide light sources. The PF50 uses photoluminescent technology so these signs do not require any electricity to operate, are safe to handle and can be recycled.

FEATURES

- Visible at 50 feet
- Zero energy consumption - zero cost, green design, sustainable
- Zero maintenance - no bulbs, no battery replacement
- Non-toxic, non-radioactive
- No disposal cost
- Designed for wall, flag, ceiling or conduit mounting
- Can be used for both high-level and low-level applications
- Movable if egress paths change
- Thin, low profile construction
- Consistent, uniform illumination
- Recyclable
- LEED points contributor
- Available in red, green, black frames or white with red and white with green frames

GLO BRITE® P50 RUNNING MAN

The pictograph of the Running Man is the international symbol for exit and is easily recognized by international travelers. Glo Brite® photoluminescent running man signs are the intrinsically safe, zero energy, environmentally friendly solution for marking emergency evacuation routes. Running man exit signs comply with National Building Code of Canada (CAN/ULC -S572.) P50 signs are engineered with photoluminescent material that absorbs and stores LED light, fluorescent, metal halide or mercury vapor light sources. Glo Brite® signs create clear, brightly glowing egress pathways during emergency or blackout conditions.

FEATURES

- Visible at 15.25 m
- Zero energy consumption – zero cost, green design, sustainable
- Zero maintenance – no bulbs, no battery replacement
- Non-toxic, non-radioactive
- No disposal costs
- Designed for wall, flag, ceiling or conduit mounting
- Easily movable if egress path changes
- Thin, low profile construction
- Consistent, uniform illumination
- Recyclable
- LEED point contributor

Before installation determine that there is a minimum of 21.6 lx LED or 54 lx of light on the face(s) of the sign at all times during building occupancy.

Hardware included for wall, flag, ceiling or conduit mounting

GLO BRITE® EGRESS PATH MARKING

In a dimly lit stairwell, exit path markings could make the difference between life and death. Glo Brite® egress path marking systems provide guidance in the event of an emergency. With components for marking handrails, stair treads, landings, doors, door frames and door hardware – a quick exit is possible. The nationwide building codes International Building Code (IBC) and International Fire Code (IFC), both published by International Code Council (ICC) and NFPA 101– Life Safety Code, written by National Fire Protection Association (NFPA) have added luminous egress path markings to their domestic codes. The IBC and IFC requirements are enforced by building inspectors and fire code officials. Jessup egress materials meet the IBC/IFC codes when applied according to guidelines and they dramatically improve the two most important aspects of an evacuation: time and physical safety.

In 2006, NYC Local Law 26 RS6-1 became a mandatory requirement to mark the stairwells of commercial high rise buildings. New York City 2014 Construction Code reaffirmed the stairwell markings and extended the requirement to all high rise occupancies except R-2. Jessup developed Glo Brite® photoluminescent egress markings to meet the rigorous safety standards in New York. Markings are required for all doors, steps, landings, handrails, perimeters, and obstacles in most buildings. Markings are required for hospitals, schools, businesses, hotels, public assemblies and R-1 residential buildings that have occupied floors more than 75 feet above the lowest rung of the fire department’s hook and ladder.

GLO BRITE® SAFETY SIGNS

Glo Brite® safety signs are the reliable safety signage solution for fire and other emergency situations. The photoluminescent signs absorb and store ambient light so they are immediately visible in the case of an emergency or blackout conditions. They do not require batteries, so you can rely on them to clearly mark and light safety equipment and fire exits and reduce the risk of panic.

Jessup Manufacturing Company has over 60 years of experience making adhesive coated and laminated materials, including photoluminescent films and sheets. Jessup products are used in many industries as component parts, site safety equipment, and graphics. Jessup has two manufacturing plants in the United States and is headquartered in McHenry, Illinois.

If Jessup's best-selling products are not perfect for your application, please contact us to develop your own material. With Jessup's Solve + Make™ service, we can combine the substrate, adhesive, and liner that best meets your requirements. Contact Jessup at jessupmfg.com to start a conversation or by calling 888-711-7735.
