

## Introducing *Safety Track*<sup>®</sup> 3236 *Ruff-N-Tuff*<sup>™</sup> Grit

### Finally. Anti-Slip Tapes and Treads as Rugged and Hard-Working as You.

You tackle the harshest environments on the planet. Oily, greasy rigs. Saltwater spray covered decks. Glassy ice and snow everywhere. On workboats, tankers, railcars, earth movers, aircraft and more...your job is tough, your ability to maintain safe, secure footing is tougher.

We've been there. Off-shore rigs. Barges, tows...the tar sands. And growing up in the Midwest, we know all about de-tasseling corn, baling hay and processing livestock. Like you, we learned early-on that safe, secure footing in harsh environments is more than important – it's a life-safety issue.

Those experiences, coupled with more than six decades of slip-and-fall engineering expertise at Jessup, resulted in the development of Ruff-N-Tuff<sup>™</sup> – anti-slip tapes and treads as tough as you and tougher than your environment.

**Order now: 1-888-711-7735.**

**Available in:**

60' rolls: 2", 4", 6", 12", 24", or 48"

30' rolls: 6", 24", 48" and

Treads: 6" x 24"/25 per pack

### The Grip that is Dead Serious About Life Safety

*Ruff-N-Tuff*<sup>™</sup> excels where all others fail because we don't use wimpy epoxy; no PVC, which shreds way too easily; no messy sprays with inconsistent grit. Nope.

*Ruff-N-Tuff*<sup>™</sup> is built for your work environment. We use the heaviest duty aluminum oxide anti-slip grit drenched in one of the toughest polyurethane coatings on the planet and applied consistently and uniformly on the finest rip-resistant proprietary material backed by a wickedly strong adhesive.

## Introducing *Safety Track*<sup>®</sup> 3236 *Ruff-N-Tuff*<sup>™</sup> Grit

**Tough Enough for You;  
Easy Enough for Grandma!**

**Yes, easy enough for Grandma.**

At least in terms of installation. We chose Grandma because we know she'll clean the surface before installation. This is not to say you would not clean the surface prior to installing, we just know that Grandma would make sure the surface was immaculate before installing.

As soon the surface is clear, you simply peel and stick. No messy tar to spray, no grit to apply...just clean, peel, stick and go.

***As Grandma would say, "Easy peasy!"***
