

SAFETY TRACK®

NON-SLIP TAPES AND TREADS

Category Resilient

Rubberized, textured PVC tapes and treads strong enough for work shoes yet comfortable enough for bare feet.

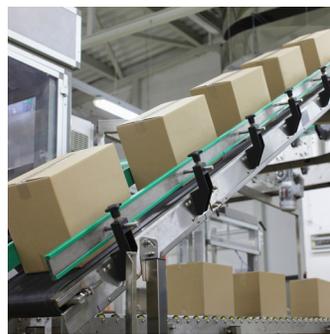

Safety Track® Resilient Medium – 3500

Resilient Medium Grade is used for secure footing at door thresholds, stairs, vehicles, and equipment where safe footing is essential. Resilient is designed for heavy foot traffic yet it's comfortable for bare feet. Can be used for both commercial and industrial indoor applications and is certified "High Traction" by the National Floor Safety Institute and it's also mop-friendly for easy cleaning. Available in black, gray and clear and a variety of tape width and tread sizes.

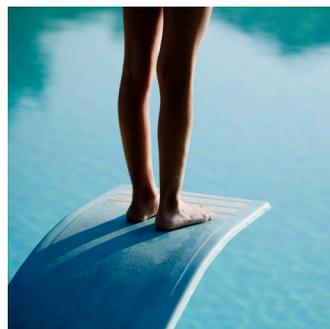

Possible uses:

Ladders, step stools, scaffolds, conveyors, cross overs, pulleys, Steps, stairs, platforms

Recreational vehicles - snow mobiles, ATV's, garden tractors, lawn movers

Outdoor - water skis, surfboards, jet boards, boat skis, swimming pools, pool accessories, diving boards

Fitness equipment; gyms, health clubs
